Accenture

Key Accomplishments - Application Development for Nokia Siemens Network

- NSN was using a legacy PLM (Product Lifecycle Management) tool and sought help from Accenture to migrate huge data sets to a new tool named Enovia

- I, along with couple of other developers, wrote a middleware in Spring & JMS technologies

- Successfully migrated data to the new PLM Tool

Zero One Technologies

Key Accomplishments - Application Development for Standard Chartered Bank

- I was part of SCB's Ops team, responsible for monitoring application.

- I contributed to a product named EUE (End User Experience) which mocks user actions in to an application and capture results and response times

- I wrote python scripts that capture the user flows and deployed the scripts in different regions that feeds EUE with the data about application's behaviour
